**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3, drawn to a chiral resin, classified in class 526, subclass 316(ketone), 346 (aromatic).
  - II. Claims 4-8, drawn to a method to synthesize the chiral compound libraries, classified in class 562, subclass 400 (oxidation), 523 (carboxylic acid), 531(aldehyde), and 538 (alcohol).
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP ' 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as a process to use the chiral resin for chelating the polar molecule for surface acoustic sensor.
1. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject

Art Unit: 1713

matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### **Conclusion**

6. The summary of claim 1 is as flows,

A chiral resin

Wherein R = [H, C<sub>1-6</sub> alkyl, C<sub>1-6</sub> branched alkyl]

n = an integer ranging from 1 to 3;

m = an integer ranging from 0 to 3
